PMS GROUP

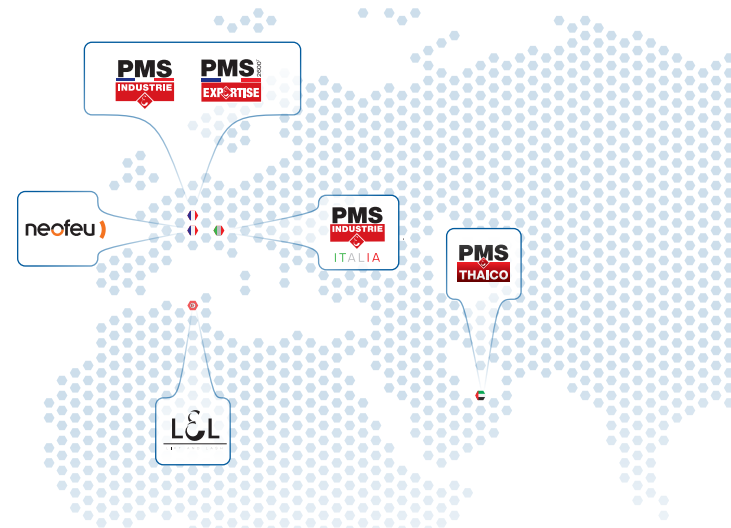

by **PMS GROUP**

FABRICANT FRANÇAIS

Working with the various companies of the group means choosing the quality of unique know-how, the experience of a manufacturer and the strength of a united and committed team of employees.

All the Group's companies are **ISO 9001:2015** certified. With products recognised as complying with European standards and GS certification, the Group enjoys the trust of the most demanding professionals.

THE COMPANIES

FRANCE

France's leading manufacturer of lifting and lashing equipment since 1985, **PMS Industrie** manufactures and markets a very wide range of products. From single units to large production runs, from standard to customised, the company is a genuine designer of solutions in the fields of lifting, lashing and polyurethane protection.

FRANCE

For over 60 years, **NEOFEU** has specialised in personal protective equipment (PPE) for fall arrest (harnesses, lanyards, fall arrest systems) and load arrest. It designs, manufactures, and tests a range of solutions designed to prevent people and loads from falling from heights.

FRANCE

PMS 2600 EXPERTISE is committed to providing a service dedicated to safety via a testing laboratory, a periodic product inspection service and a training centre for lifting and lashing.

U.A.E

PMS & Thaico manufactures and markets lifting, lashing and personal fall protection equipment for the Middle East market from the United Arab Emirates.

ITALIA

PMS Industrie ITALIA sells the entire range of **PMS GROUP** products on the Italian market from its premises in Cirié (Turin).

TUNISIA

Founded in 2004 in Tunisia, **Lift & Lash** manufactures textile equipment for lifting, lashing and fall protection.

OUR AREAS OF EXPERTISE

We select the **best products** available on the market and **manufacture the unique solution** you need.

- 
Lifting
 Round and flat textile slings, cable and chain, standard and made-to-measure. Specific Grizzly UHMWPE fibre slings, special pipeline straps, etc... From 500kg to 600T and more.
- 
Lashing
 100% Pro lashing systems: Textile lashing from 25 to 75mm, standard and made-to-measure. Chain lashing for machine carriers. Internal lashing, stainless steel and patented PMS Industrie products: Tenso - SnowCramp XXL.
- 
Polyurethane protection
 Sleeves - coatings - spray - corners: everything to protect your slings and products to be handled.
- 
Fall protection solutions
 Full body harnesses, lanyards and absorbers, retractable type and mobile fall arresters, anchoring devices, helmets, transport bags and load fall arresters.
- 
PMS 2600 Expertise
 A complete test laboratory / a survey service for lifting, lashing and PPE equipment / a training centre / a periodic inspection service.

OUR CSR COMMITMENTS

Decarbonation mission with **bpifrance**

Production units in **France**

Reduction of plastic packaging

Choice in the origin of components

Repairability and product lifespan

Waste sorting and recovery

a Product, a Mass, a Solution

A major player in Europe and leader in France, PMS Industrie has been manufacturing a **wide range** of lifting and lashing equipment since 1985. PMS Industrie products are marketed through a network of more than **3,000 distributors**.

Working with PMS Industrie means choosing quality and the unique expertise of a genuine manufacturer.

LIFTING

PMS Industrie designs and manufactures a complete range of standard and made-to-measure lifting solutions: from textile slings (round - flat - UHMWPE) to steel slings (cable - chain), including technical solutions developed in collaboration between you and our design office: netting, window lifter slings, special pipeline slings, etc.

Textile slings: round, flat, multi-leg, made-to-measure from 500 kg to 600 tonnes and more

Steel slings (chain, cable)

UHMWPE fibre slings up to 2100 tons mbl

LASHING

From light commercial vehicles to heavy goods vehicles, PMS Industrie designs and manufactures lashing solutions that are **100% compliant** with current standards: standard and made-to-measure

Lashing systems

Ergotruck reverse tensioner

Tenso

Powertruck

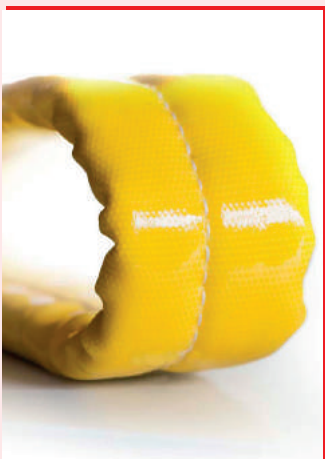

Steel lashing system for machine carriers

POLYURETHANE PROTECTIONS

PU is undoubtedly one of the most resistant materials when straps or slings are used to handle sharp objects.

PMS Industrie's expertise is recognised by the industry for the quality of its products and the responsiveness of its production.

LOAD ARRESTERS

NEOFEU load arresters consist in an efficient solution in many fields of applications to automatically arrest the fall of a load. They offer an additional protection in case of failure of the primary system intended to restraint or transport the loads.

NEOFEU load arresters work on both static and moving loads through their automatic retracting cable. In case of failure and consecutive fall, the brake activates and locks the load on a short distance between 30 cm and 1 m.

In each case one solution. Beyond a wide range of standard devices, we also study your **specific configurations of loads** to secure, **dimensions** and range of movements. We adapt to **your workplace requirements** and to the standards of **your industry**.

BIG - Load arrester - 5 tonnes
from 300 kg to 5 tonnes

BIG - Load arrester - 250 kg
from 100 to 500 kg

COMPREHENSIVE TESTING LABORATORY

1
30 T

Measures a product's tensile strength

2
120 T

Measures a product's tensile strength.

3
300 T

Measures a product's tensile strength.

4
100 T

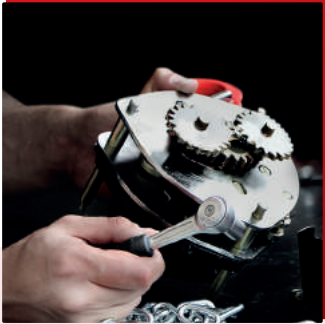

Measures the compressive strength of a product.

5
2600 T

Measures the tensile or compressive strength of a product.

TRAINING COURSES

To guarantee maximum safety in all work situations, **PMS 2600 EXPERTISE** provides a wide range of training courses to enable operators to master their equipment in complete safety.

PERIODIC GENERAL INSPECTIONS

Basic training in periodic general inspections of work equipment, lifting accessories and personal fall protection equipment.

- Presentation of the various existing systems.
- Regulatory requirements in terms of controls and periodic general inspections.

SLINGING

Basic training in slinging devices.

- Presentation of the various existing slinging devices.
- Regulatory requirements.
- Essential requirements of the Machinery Directive.

LASHING

Training in the main load securing devices on road vehicles.

- Presentation of lashing principles.
- Presentation of the main existing load securing devices on road vehicles and their regulatory requirements.
- Main rules for using and maintaining compliance with lashing devices.

FALL PROTECTION EQUIPMENT

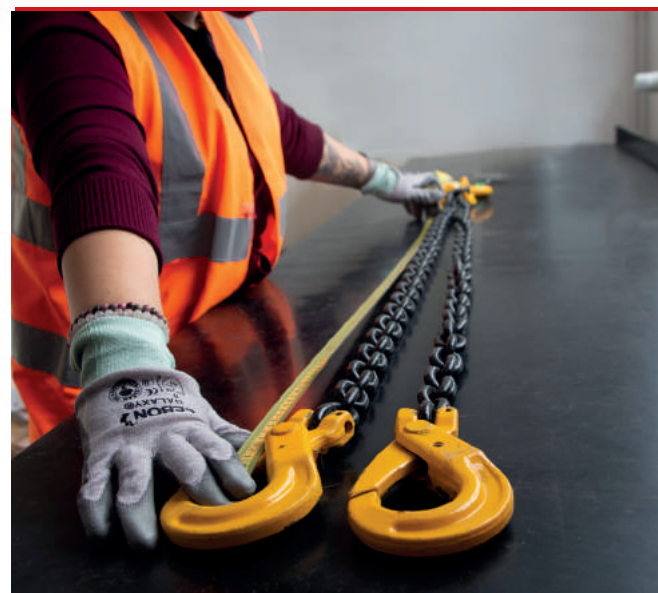

Basic training in personal protective equipment against falls from a height.

- Presentation of PPE approval requirements.
- Rules for using PPE.
- Regulatory requirements for PPE inspections.

PERIODIC INSPECTION SERVICE

In keeping with our philosophy of partnership, we wanted to offer you an additional service and solution for **the traceability of your equipment**. By choosing **PMS GROUP's** products and support, you benefit from our expertise as a **French manufacturer with a long history** in the sector.

We can carry out **Periodic General Inspections** of your equipment on your behalf, according to a fixed price to be defined together (*at our premises or at your site*).

OUR TEAMS AT YOUR SIDE

To strengthen our partnership and support you in the distribution of our products, PMS GROUP deploys a sales and technical team throughout France and abroad.

Contact them to arrange personalised support for our various ranges of technical products.
